

Student's Name: _____
Research Advisor: _____

Semester and Year: _____
Academic Advisor: _____

Research Advisor's Report
Department of Biomedical Informatics
Columbia University

Assessment: 1=Unsatisfactory*
2=Satisfactory*
3=Very good*
4=Excellent
*1, 2 (and 3 for PhD and postdoc degree students) require recommendations and plan

1. Literature Analysis Synthesizes and evaluates prior work in the scientific literature that is relevant to the research area	1	2	3	4
2. Innovation and Independence Generates innovative research goals and formulates plans to achieve them using scientific methods	1	2	3	4
3. Implementation Implements research ideas using information technology or related tools and resources	1	2	3	4
4. Scientific Communication Expresses research issues clearly and persuasively through scientific writing and presentations	1	2	3	4
5. Working Attitude Collaborates with members of the research lab in a professional manner and demonstrates a high level of commitment and effort	1	2	3	4
Total:	1	2	3	4

PhD and postdoctoral degree students are expected to receive 4s in each category above. Scores of 1 and 2 (and 3 for PhD and postdoctoral degree students) require recommendations and plan
